

ADA

Mr. John's ADA units help provide for people with special needs. This unit is fully ADA compliant and features roll-in access, a wider door, spacious interior, and handrail support. When ordering portable toilets for special events, keep in mind that the Americans with Disabilities Act requires that 5% of all units ordered be wheelchair accessible, or a minimum of one per each order.

With more accommodating dimensions, ADA units are a great option when maximum space and accessibility are needed.
